

Hayes Barton Animal Hospital

Dental/Anesthesia Consent Form

Monitoring Your Pet

Your pet is with us today for a surgical procedure that will require anesthesia. We will perform a physical exam along with pre-anesthetic blood work prior to the administration of anesthetics. This will allow us to check liver, kidney, and red blood cell values in order to rule out pre-existing internal problems that may not be evident on physical exam. Your pet will also have blood pressure, pulse oximetry, and EKG monitoring, as well as intravenous fluids. An antibiotic injection will be given (if applicable), the teeth cleaned and polished, a gum tissue rinse applied, and a dental/oral exam performed.

Extractions

The dental exam and removal of any tartar may reveal the need for extractions. Most extractions are minor but some extractions are quite involved and may require gum surgery. As a result the cost of extractions can range from \$30.00-\$175.00 per tooth. We will make every attempt to contact you by phone if the need arises for extractions.

In the event that we are unable to reach you by phone please specify the additional dollar range you are comfortable spending for extractions given the advantages of completing the procedure while your pet is here and already under anesthesia.

Up to \$80.00 Up to \$175.00
 I would prefer to NOT pursue any lengthy extractions today if you are unable to contact me.

Authorization

I authorize Hayes Barton Animal Hospital to administer anesthesia, prescribe medication, or treat my pet _____. I understand that no guarantee of successful treatment can be made. I accept financial responsibility for the treatment of my pet and I understand that payment in full is due upon release of my pet from Hayes Barton Animal Hospital.
